Creating a Second Life for Plastic.

We have created a culture committed to protecting our environment by providing our customers with innovative packaging made with recycled plastic.

smart. secure. sustainable.

Sustainability is engrained in all aspects of our business so we can reduce our impact on the environment. Since our company's inception, EasyPak has been using recycled content as a main ingredient in our packaging containers, trays and other thermoformed packages. We strategically create second life market opportunities for recycled PET products. After all, curbside recycling is only effective if there is a market for those collected products.

our sustainability mission

Produce sustainable packaging that meets our customers' needs

Reduce our impact on the environment at our operations

Be a true sustainability partner for our customers

meat trays

EasyPak offers a complete line of post-consumer recycled APET meat trays designed to enhance the display of freshly packed meats. Using our proprietary, patent-pending honey-comb like structure, our trays can capture and hold juices and liquids even when inverted. These trays are designed to be stretch wrapped without warping or puncturing the film making them perfect substitutes for foam trays.
